NOTICE

**Only Non-powered Particulate Respirators are listed here!
Call 1-800-35-NIOSH for listings of other Certified
Respirators**

On July 10, 1995, a new NIOSH certification program for respirators went into effect. This regulation, 42 CFR Part 84, replaced the long standing regulation 30 CFR Part 11. (Commonly referred to as Part 84 and Part 11, respectively.) The new Part 84 covers all respirator types (self-contained breathing apparatus, air-line respirators, gas and vapor respirators, powered air-purifying respirators, etc.) but only the standards for non-powered, particulate respirators have changed from the provisions of the old Part 11.

The respirators listed here are ONLY non-powered (negative pressure) particulate respirators that have been tested and certified by NIOSH under provisions of the new Part 84. Many other respirator types, such as particulate filters in combination with gas and vapor cartridges, have been certified under provisions of Part 84 but are not included in this listing. Inquiries about other respirators may be made to 1-800-35-NIOSH. This list is updated periodically as additional non-powered, particulate respirators are certified.

The effective date of the current list is March 31, 2001
